Art Unit: 1746

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claim 26 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/865,473 in view of either Kirby (U. S. Pat. No. 2,691,986) or Berger, Sr. et al. (U. S. Pat. No. 3,026,628). Re claim 26, note that claim 1 of the '473 application discloses all of the features (A)-(G) as claimed, with the exception of the pump means using power from the power supply for forcing heated water from said tank into said washing chamber for spraying the heated water onto the kitchenware on said rack via said at least one spray head to at least in part bathe the kitchenware during a bathe cycle as recited in the last paragraph of claim 26. Nonetheless, although not specifically claimed in claim 1 of the '473 application, the claims does claim in section (E), that water is supplied during the bathe cycle, and for proper operation, water must obviously be provided during the bathe cycle. Kirby and Berger are cited disclosing the arrangement of providing a bathe cycle with pump means providing for forcing heated water from a tank to the wash chamber. It therefore would have been obvious to one

having ordinary skill in the art to provide the system of claim 1 of the '473 application with a pump as taught by either Kirby or Berger, for the purpose of positively moving the heated water as is common in the art. This is a provisional obviousness-type double patenting rejection.

3. Claims 1-7, 9-22, 27 and 28 are allowed.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
